

Tenable.sc Management Dashboard

The following widgets are displayed on the **Tenable.sc Management** dashboard:

- The **IPs Unmanaged by Tenable.sc** widget lists those IPs not managed in the Tenable SecurityCenter. Asset Manager pushes these IPs to the Tenable SecurityCenter.
- The **IPs Unmanaged by Asset Manager** widget lists the IP addresses that Asset Manager cannot access, indicating a lack of visibility into the network on which they are located.
- The **IPs Managed by Tenable.sc and Asset Manager** widget lists the IP addresses receiving the benefits of both Asset Manager and Tenable SecurityCenter management.
