Opening Attached Command Centers from Portal 3.3

The method to access attached Command Centers has been enhanced in this 3.3 release. Also, users who log in with read-only access can choose to open to either the home page or a zone map. See Portal-to-CC Login for Portal 3.2.7 Users for the Lumeta Portal 3.2.6 and 3.2.7 login options.

- **Edit -** Allows superusers (only) to edit the Command Center's identifiers, position on the map, and license descriptors. The Edit button only displays for superusers.

Label	Spectre 3.3 Command Center		Serial Number	201802
Version	3.3.0.11209		Activation Date	2/13/2(
Latitude	55		Grace Period	7
Longitude	33		Lifetime	perpetu
			Use By	2/20/2(
			IP Count	0
			Scouts	0

- **Read-only Access** - Provides portal users with read-only access to either the Home page or to a zone map on their selected Command Center. With this type of access, you can either open to a Command Center's Home page or to a particular zone map.

To open the Home page of a Command Center:	To open one zone map on a Command Center:

- **Credential-based Access** - Opens the login screen to the selected LumetaCommand Center. Once you have authenticated, you can use the system in accordance with your user role.

Controls for superusers

Only a superuser can add a Command Center to the Portal, or delete one. Only a superuser can manage users. Accordingly, the Settings menu and the Edit button only display on the Portal landing page for superusers.
