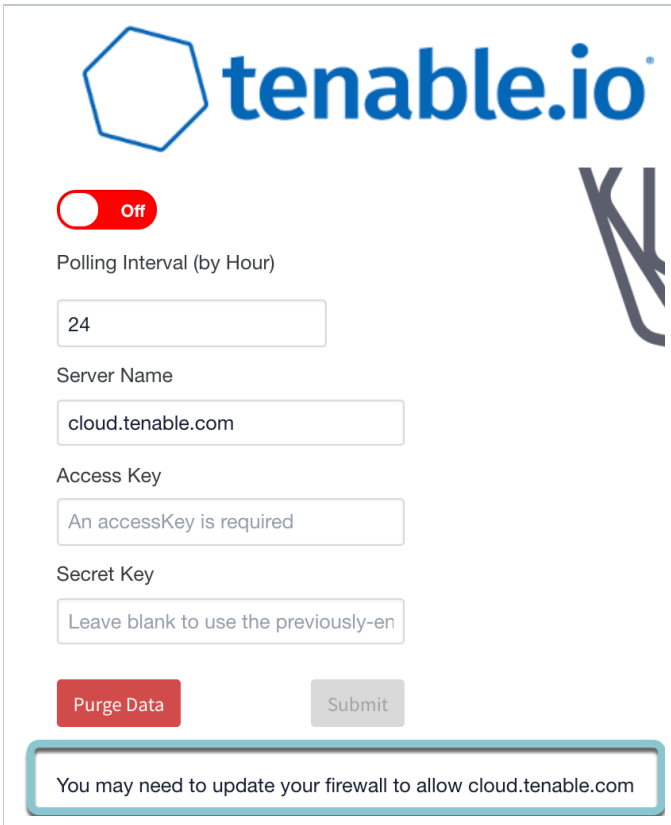
Integrations Overview

Asset Manager amplifies the value of your security stack by feeding it comprehensive and authoritative data about your network. These feeds are accomplished through the Asset Manager API and through various integrated data connectors. Some of these connectors identify vulnerable networks and devices by matching Asset Manager-discovered data with ingested threat intelligence. Indexed data on these correlations are provided to users via Asset Manager's browser interface. Unstructured data and query results are delivered via API to other systems in a user's network ecosystem. These enable customers to resolve, re-route, sandbox, patch, and remediate problems when they occur and maintain the health and security of the system as a whole.

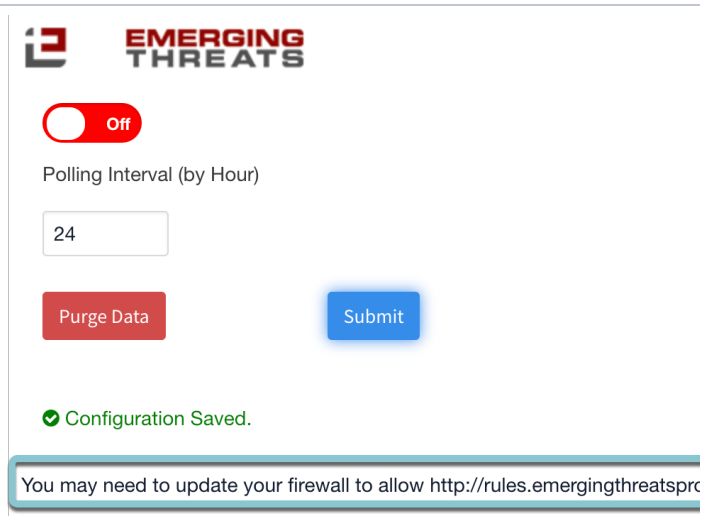
The setup to receive data feeds from third party applications to Asset Manager involves adding a URL or IP address to your firewall whitelist. This information has been added to each integration's configuration page on Settings > Integrations.

A few representative examples:



The IP address will display for these integrations:

- BlueCat
- Carbon Black
- FireMon
- McAfee
- Qualys
- Rapid7
- RedSeal
- Tenable.sc
- Tenable.io
- Tripwire



Emerging Threats - http://rules.emergingthreatspro.com

The following table is intended to give you an overview of the dashboards and data sources that are correlated with Asset Manager discovered-and-indexed network data. You can sort the table by column heading. Open the Dashboards dropdown on the Home page of this site for more on each add-in.

Type	Integration	Dashboard(s)
Risk Management	FireMon Security Manager	FireMon Management Dashboard
Cloud	Cloud Defense	DisruptOps Cloud Dashboard
Breach Detection	TOR	Breach Detection

Breach Detection	SANS ISC	Breach Detection
Breach Detection	iDefense	Breach Detection - iDefense Dashboard
Breach Detection	Proofpoint Emerging Threats	Breach Detection
Endpoint Detection & Response	VMware Carbon Black	Carbon Black Management Dashboard
Endpoint Detection & Response	Trellix ePO	Trellix ePO Management Dashboard
IP Address Management	BlueCat	BlueCat Management Dashboard
IP Address Management	Infoblox NIOS DDI	Infoblox Management Dashboard
Host Vulnerability Management	Qualys	Qualys Management Dashboard
Risk Management	Tripwire	Tripwire Management Dashboard
Endpoint Detection & Response	RedSeal	RedSeal Management Dashboard
Host Vulnerability Management	Tenable.sc	Tenable.sc Management Dashboard
Host Vulnerability Management	Tenable.io	Tenable.io Management Dashboard
IP Address Management	Cisco Meraki	Management Station Devices Reports
Risk Management	Rapid7	Rapid7 Management Dashboard
Security Stack Managers	Splunk	Asset Manager's Dashboards in Splunk
Security Stack Managers	ServiceNow	ServiceNow Integration Overview
