# About the Dashboard Utility Tray

The dashboard utility tray (aka widget toolbar) displays when your mouse cursor hovers over a dashboard widget. It's also available at the bottom-right corner of Report pages (i.e., Reports > Browse Real-Time).

Icons on the utility tray provide the following functionality:

a. **View as Table** - Allows you to toggle between displaying data as a chart or as a table, as illustrated here:

DNS Summary

test.lumeta.com

corp.lumeta.com

View as Table

1m ago

DNS Summary

Key	Value
corp.lumeta.com	108
test.lumeta.com	7

View as Chart

2m ago

b. **Info -** Displays information on the selected report or dashboard widget including its source name and type. The info widget also identifies the filters and parameters that were applied to the source.

Widget information

Source   Filter   Parameters

```
1   SELECT * FROM saved query("forwarding devicetype detail")
```
✓

Source name	forwarding devicetype detail
Source schema	public
Source type	Query
Source comment	*no comment*

🔍 Use query in search

Widget information

Source   Filter   P

```
1   select d.dev
    ce_active as
    device_first
    _char(d.devi
    d", d.zonei
2       from de
3       join zo
4       left jo
    nd mh._sour
5       order b
```

c. **Open Query in Search** - Runs the Query in the query interface
d. **Refresh Widget** - Refreshes the selected chart or table. Time elapsed since the widget or report was last refreshed is indicated at the end of the utility bar
e. **Print** - Prints the widget to a printer or to PDF. Use your browser's Save-to-PDF option to save to PDF format
f. **Export** - Exports the widget to a file in CSV, JSON, or NDJSON format
