

Installing the Asset Manager's Extension on the Trellix ePO Server

Asset Manager fetches Trellix ePO-managed data, compares it to Asset Manager-discovered data within the same network space, and then pushes the findings back to the ePO server. This ensures on a continual basis that ePO has the complete set of networks and devices to manage. Procedures to install the Asset Manager's Extension to and uninstall the Asset Manager's Extension from the Trellix ePO Server follow.

Obtain Asset Manager Extension

Contact your TAM for the latest Asset Manager Extension for Trellix ePO.

You can also email support@firemon.com and request the Asset Manager Extension. Please Provide your Asset Manager Version and ePO Version in the ticket.

Installation

1. Log in to the Trellix ePolicy Orchestrator.
