

Infoblox Management Dashboard

To amplify Infoblox IP address management capabilities, first [configure the Asset Manager Infoblox feed](#), and then review the IP Address Management dashboard, located on Asset Manager's Dashboards > Integrations menu.

The dashboard provides a variety of useful information:

IPs Unmanaged by Infoblox - IPs Asset Manager found on your network that Infoblox doesn't know about and doesn't have under management. Together, these unknowns represent a knowledge and IPAM gap—a vulnerability that could be exploited. This information is presented visually, in a bar chart that shows the volume of unmanaged, and also in a table with details on each unmanaged IP address (i.e., IP and MAC address, responsiveness and when the first and last response was received, and the Zone in which the device is located).

IPs Unmanaged by Asset Manager - These are those IPs managed by Infoblox that Asset Manager did not find on the network. Typically there will not be any devices managed by Infoblox that have not been indexed by Asset Manager. In the event these widgets show results, check your Asset Manager discovery configuration, which is not providing the level of visibility you require. Contact us for help in identifying the prospective source of the problem.

Infoblox- and Asset Manager-Managed IPs - When this subset becomes the whole (i.e., when all devices are managed by both resources, you have complete, demonstrable IPAM—useful in managing physical and virtual address space.

Following is the IP Address Management dashboard. All analytics from the Infoblox feed go here. None affect Map filters, Reports or Search.

IPs Unmanaged by Infoblox

IP Address	Mac Address	Active	devicetype	os	zonename	First Observed	Last Observed
fe80::32f7:dff:fe50:d5aa		true	Infrastructure	(Cisco)	Lumeta-333	05/21/2019 04:02:55	05/18/2020 08:00:31 PM
fe80::200:caff:fe11:2233		true			Lumeta-333	03/08/2020 02:54:53	05/18/2020 08:00:31 PM
2601:44:1:b9c0:e9b3:feca:a161:75dc		true			Lumeta-333	03/08/2020 04:09:14	05/18/2020 08:00:31 PM
2600:802:460:652::2		true			Lumeta-333	09/03/2019 11:33:07	05/18/2020 08:00:31 PM
2600:802:460:652::1		true			Lumeta-333	10/14/2019 12:51:08	05/18/2020 08:00:31 PM

Records 1 – 50 of 1000

IPs Unmanaged by Lumeta

IP Address	DNS Name		
10.101.9.86	missing.domain.local		
10.101.10.87	missing.domain.local		
10.101.10.75	missing.domain.local		
10.101.14.20	missing.domain.local		
10.101.10.55	missing.domain.local		
10.101.13.172	missine.domain.local		

Records 1 – 50 of 1000

Infoblox and Lumeta Managed IPs

IP Address	active	First Observed	Last Observed	dns	os		
216.200.129.145	true	04/03/2018 09:45:17 AM	05/18/2020 08:00:31 PM	missing.domain.local			
216.200.129.144	true	04/03/2018 09:45:17 AM	05/18/2020 08:00:31 PM	missing.domain.local			
216.200.129.141	true	04/03/2018 09:45:17 AM	05/18/2020 08:00:31 PM	missing.domain.local			
216.200.129.86	true	04/03/2018 09:45:17 AM	05/18/2020 08:00:31 PM	missing.domain.local

216.200.129.84	true	04/03/2018 09:45:17 AM	05/18/2020 08:00:31 PM	missing.domain.local			

Export or Push Data to Infoblox

Asset Manager automatically pushes the device attributes of operating system (OS), device type, and DNS name to Infoblox.

All data in any dashboard widget can be exported from Asset Manager by clicking the Export icon (i.e., the away-pointing arrow), then imported to Infoblox. when you get to Infoblox, you can click on the Data Management tab and Search for CIDRs and associated IPs from Asset Manager.

The data displays in Infoblox as

- **DNS** - domain name service
- **OS** - operating system
- **Site Value** - data source, such as "FireMon" if you're using an earlier software release
- **Device Type** - category of asset such as router, printer, switch

Submit a comment at the bottom of this page if you have a question or need additional information about the IP Address Management dashboard.
